

## Automation Script

A Python script that launches and automates a browser using the Playwright library.

— Launch and Automate —>

## Browser

In this case Chromium was chosen. Alternatively, Playwright also supports Edge, Firefox, Opera and Safari.

Load

## Browser Extension

The browser extension analyses web pages opened in the browser and sends the result to a REST API.

← Send Result Data —

## Data Collection Script

A Python script that serves a simple REST API which receives data from the browser extension and appends it to a CSV file.
